

MUNEPPA GARI DEEPIKA

Software Engineer (Fresher) | Computer Science & AI

+91 8074050535 | mdeepika04888@gmail.com | [linkedin.com/in/deepika8074](https://www.linkedin.com/in/deepika8074) | github.com/deepu80291

PROFESSIONAL SUMMARY

Computer Science & AI engineering graduate (2026) with hands-on experience in Java full-stack development, machine learning, and data analysis. Built and deployed ML models achieving 99%+ accuracy and interactive analytics dashboards using Python. Strong foundation in OOP, DBMS, and REST-based application development, with a track record of applying classroom concepts to real, measurable project outcomes. Seeking an entry-level Software Engineer / ML Engineer role to contribute technical skills and problem-solving ability from day one.

EDUCATION

Madanapalle Institute of Technology and Science B.Tech in Computer Science and Engineering (Artificial Intelligence) — CGPA: 8.03	2022 – 2026
Sri Venkateswara Junior College Intermediate (MPC) — 87.7%	2020 – 2022
Amar Vidya Mandir SSC — 93%	2019 – 2020

TECHNICAL SKILLS

Programming Languages: Java, Python, HTML, CSS, JavaScript

Databases: MySQL, SQL

ML / Data Tools: NumPy, Pandas, Matplotlib, Scikit-learn, Jupyter Notebook

Other Tools: Excel, Power BI, Git/GitHub, VS Code

Core Concepts: OOP, DBMS, Data Structures & Algorithms, Machine Learning, Deep Learning, REST APIs

INTERNSHIP EXPERIENCE

Java Full-Stack Development Intern — Tap Academy	Jan 2026 – Present
- Building and testing frontend and backend modules for a Java-based web application, integrating UI components with MySQL-backed services. - Implementing CRUD functionality and debugging real-time application issues alongside a mentor-led development team. - Practicing OOP and DBMS concepts through hands-on coding exercises and code reviews.	
Machine Learning Intern — Pragyashal Pvt Ltd	Jun 2025 – Aug 2025
- Cleaned and preprocessed raw datasets (handling missing values, encoding, and normalization) to prepare inputs for model training. - Trained and evaluated multiple ML models in Python, comparing performance using accuracy, precision, and recall metrics. - Documented experiment results and presented findings to the team to guide model selection.	

PROJECTS

Heart Disease Prediction System — Machine Learning, Reinforcement Learning
- Designed a disease classification pipeline comparing Random Forest, ANN, and Deep Q-Network (DQN) models on the Cleveland Heart Disease dataset. - Tuned the DQN model to achieve 99.02% prediction accuracy, outperforming baseline Random Forest and ANN approaches. - Applied reinforcement learning concepts to a healthcare classification problem, demonstrating applied ML beyond standard supervised techniques.
Sales Analytics Dashboard — Python, Pandas, Matplotlib
Built an interactive dashboard analyzing sales trends, customer behavior, and top-performing products from transactional data, surfacing insights to support business decisions.
